DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance:

See that there is prior art regarding semiconductor devices comprising an element, a circuit tape, external elements, and pads on the element. For example, see that Goh (US 6667560) discloses the above.

However, the instant Application recites the specific limitation of a porous adhesive support layer to isolate the circuit tape layer from the semiconductor device, and the specific structural disposition of the circuit layer with respect to the semiconductor element and external terminals. The recitation of the above makes up for a structure that comprises multiple layers between the circuit element and the mounting substrate; it also specifies electrical connections between elements such as pads and terminals. The above combination of structural features, in combination with all other structural limitations in the claims, are neither obvious over nor anticipated by the prior art of record. Therefore, all pending claims are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
